

# Turnover in service industries

2013, January

## Turnover in service industries grew by 2.7 per cent year-on-year in November to January

Turnover in service industries grew by 2.7 per cent in November to January from the corresponding time period of the year before. One year previously turnover in service industries grew by 5.5 per cent. Services are here examined exclusive of trade.

### Three months' year-on-year change in turnover in services (TOL 2008)

In the November to January period, turnover developed more slowly than in the previous year in all main service industries. Turnover developed fastest in real estate activities, where it went up by 5.3 per cent from one year ago. Turnover developed most slowly in professional, scientific and technical activities and in transportation and storage enterprises, which both grew by 1.9 per cent from the previous year.

From this release onwards the statistics describing turnover in service industries will adopt base year 2010=100. At the same time, a change percentage calculated from the original indices will be adopted in

the releases instead of working day adjusted indices. Working day adjusted index series will, however, still be published in the database table.
