## Retail trade flash estimate: sales grew by 1.1 per cent year-on-year in April

According to Statistics Finland’s retail trade flash estimate, retail trade sales increased by 1.1 per cent in April from April 2017. Over the same period, the volume of retail trade sales, from which the impact of prices has been eliminated, grew by 0.1 per cent. By contrast, sales in daily consumer goods trade decreased by 1.5 per cent and the sales volume by 4.1 per cent in April from the corresponding period of the previous year.

The reported annual changes in trade sales and sales volumes are not seasonally or trading day adjusted, which means that the effects of public holidays are not considered. In April, the development of sales was partly due to Easter being at the turn of March and April this year, while last year it was in April. The fact that Easter occurs in different months is in particular visible in the sales development of food during March and April.

According to the Structural business and financial statement statistics, daily consumer goods accounted for 49.8 per cent of turnover in retail trade in 2016.

The retail trade flash estimate is based on a sample covering, on the average, 60 per cent of retail trade turnover. Data on trade sales by industry will next be released on 13 June 2018.

Flash estimates on retail trade are published at a lag of just under one month from the end of the statistical reference month. The preliminary data on motor vehicle, wholesale and retail trade based on a larger sample will be published at a lag of roughly six weeks from the end of the statistical reference month and the revised data based on total data are published at a lag of roughly ten weeks.
