

# Index of turnover in industry

2015, March

## Turnover in manufacturing contracted by close on three per cent in the first quarter

According to Statistics Finland, turnover in manufacturing in the January to March period was close on three per cent lower than in the corresponding period of the year before. Domestic sales contracted by 3.4 per cent and export turnover by 2.4 per cent from one year ago.

### Three months' year-on-year change in turnover in manufacturing (C) sub-industries (TOL 2008)

Source: Statistics Finland

**The sub-industries of manufacturing (C)** were evenly divided into both contracted and grown ones. A little more turnover than last year was generated in the food industry, 0.4 per cent, in the textile, clothing and leather industry, 0.2 per cent, and in the forest industry, 0.1 per cent. In other industries, turnover contracted year-on-year. The drop was fastest in the chemical industry, 13.0 per cent and in the electrical and electronics industry, 7.5 per cent.

**Three months' year-on-year change in turnover in main industrial categories (TOL 2008)**

Source: Statistics Finland

In the **main categories of other industries**, turnover in water supply, sewerage, waste management and remediation activities contracted by 0.1 per cent, that of quarrying and mining activities by 2.2 per cent, and that of electricity, gas, steam and air conditioning supply by 2.5 per cent from one year before.

The index of turnover in industry describes enterprises whose main industry is manufacturing. The calculation of the indices is based on the Tax Administration's value added tax data which are supplemented with data obtained with Statistics Finland's sales inquiry. The monthly turnovers of manufacturing enterprises can vary considerably, especially in the metal industries. The variation is mainly due to invoicing practices. The final invoice for major machinery deliveries and projects may be recorded in the sales of one month, even if the delivery had required the work of several months or years.
